

## Using Apple Safari

If on the training portal there are no links to the training modules, or if a link to a module is opening a new blank window...

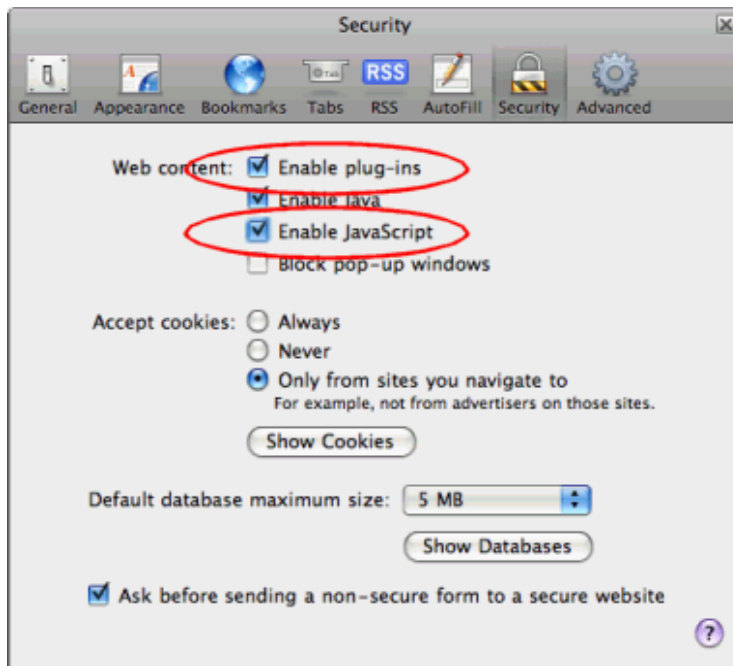

This can be due to **JavaScript being disabled in Safari's settings**. Follow these steps to configure your settings.

1. In Apple Safari click on **Edit -> Preferences...**

2. Check the **Enable JavaScript** and **Enable plug-ins** boxes...

3. **Close** the box and **Refresh** the page.
